# RIDICULOUSLY SCARY. SERIOUSLY FUN.

## CANYON SWING

It's perfectly normal to feel nervous jumping off a cliff, but boy is it fun!

The freefall is intense, lasting just a bit longer than you think it should. Then, when the swing kicks in it's smiles from ear to ear.

Is it worth it? Hell yeah it is. So much so that you will want to do it all over again!

### HOW IT WORKS

After leaping off the platform you'll free fall 60 metres, rushing past the rocky cliff so close you will think you could touch it.

Then it's a super-smooth transition from freefall to swing, soaring above the river below. Once you've stopped swinging, we'll bring you back up to where it all began.
